Care Vision^{AI} eMar

Built for Carers by Carers

Care Vision is more than just a software provider we are care providers ourselves. Born from a deep understanding of the day-to-day challenges faced in care homes, Care Vision was developed to support care teams in delivering safer, more efficient and person-centred care.

How it Works:

All-in-one system: Whether you're in a care home, supported living or hospital settings everything you need is in one place.

Saves time: Helps your team work smarter, not harder less paperwork, quicker access to information and fewer mistakes.

Keeps people safe: Makes it easier to record and check care details, so nothing gets missed and residents get the safe, high quality care they deserve.

With Your Every Step of the Way

At Care Vision, we know the importance of training. That's why we are with you and your team every step of the way.

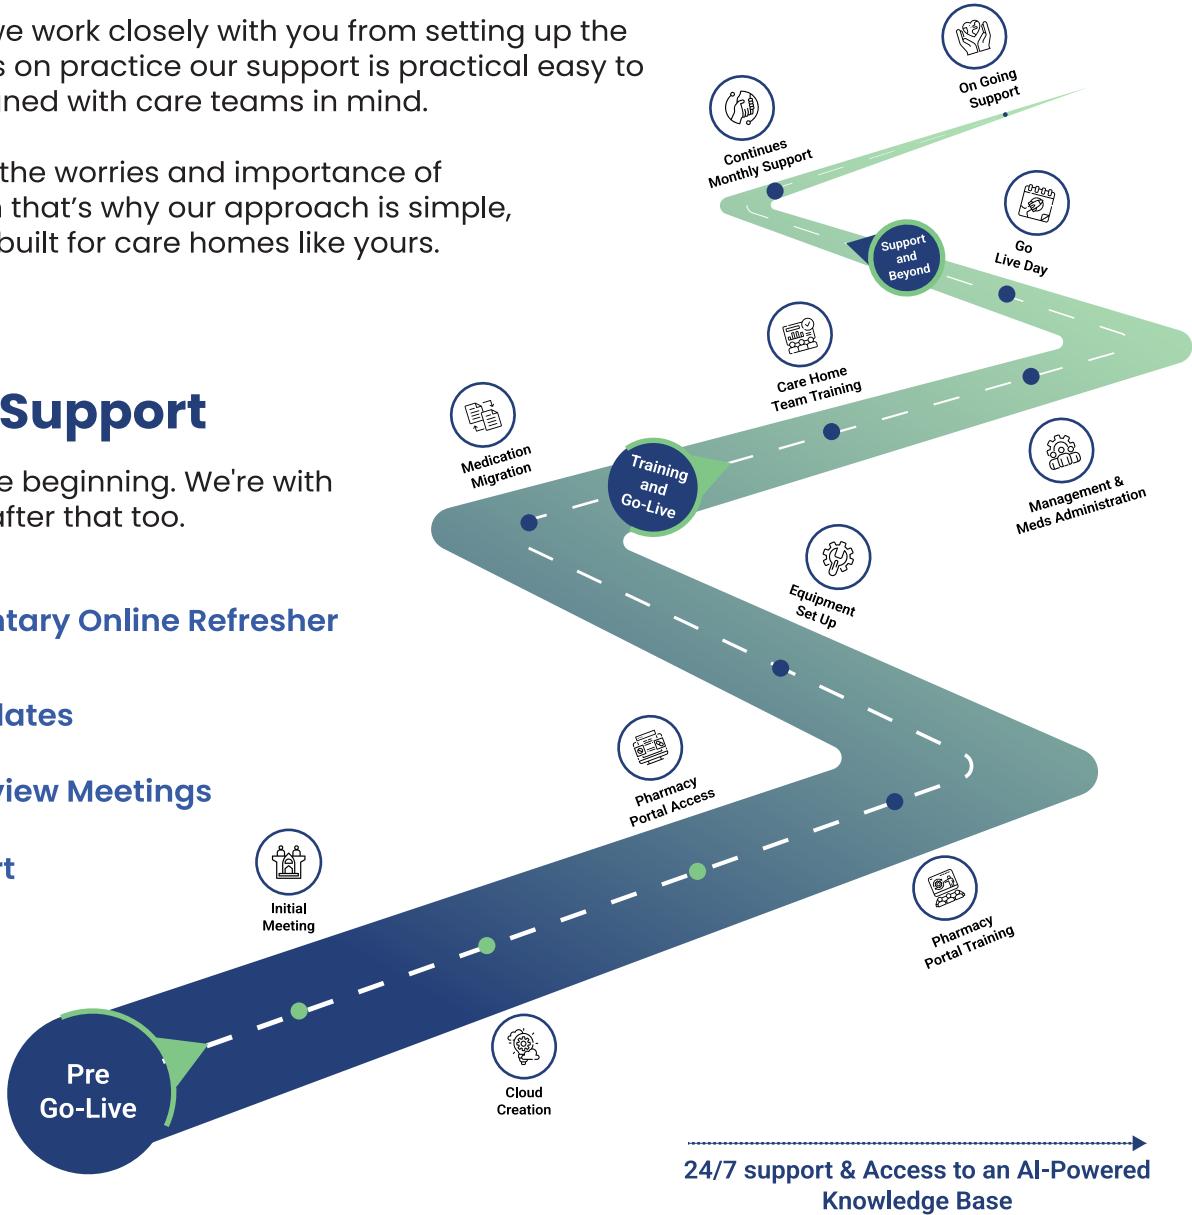

Before Go Live, we work closely with you from setting up the system to hands on practice our support is practical easy to follow and designed with care teams in mind.

We understand the worries and importance of digital transition that's why our approach is simple, supportive and built for care homes like yours.

Ongoing Support

Go Live is just the beginning. We're with you every step after that too.

- **Complementary Online Refresher Training**
- **Regular updates**
- **Monthly Review Meetings**
- **24/7 Support**

Medication Made Simple

Created by People who Understand Care

Stay One Step Ahead

No more chasing paper trails. Care Vision gives your team up-to-date info, reminders and alerts to help keep medication management smooth and safe.

Built for Real-World Care

Whether you're following NHS, CQC or local regulations, Care Vision helps your team stay compliant with care standards that matter.

Reporting Made Easy

Care Vision turns daily care into clear reports that are built in with no extra costs or external apps needed.

Medication Done Right

Medication that is simple & clear the right resident, medicine, route, dose, time & the right to refuse all at your fingertips with realtime notes. Care vision is simple & accessible for all members of healthcare team.

How eMar Works

Connected for Better Care

Care Vision connects GP & pharmacy systems, making it easier to share prescriptions and medication details securely saving time and reducing errors.

Built by Carers for Carers

We designed care vision with real care teams in mind simple to use, clear to follow and built for care homes. Regardless of your experience, Care Vision makes daily tasks easier.

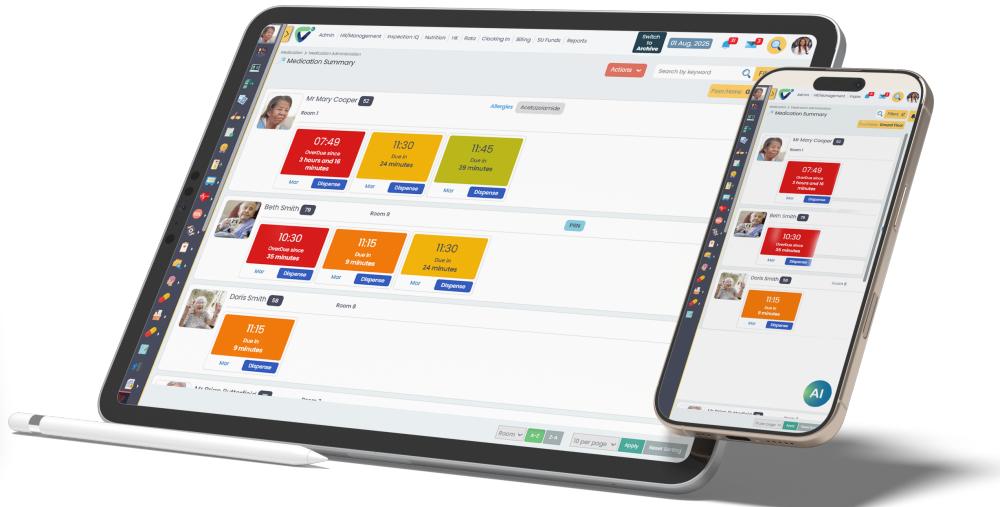

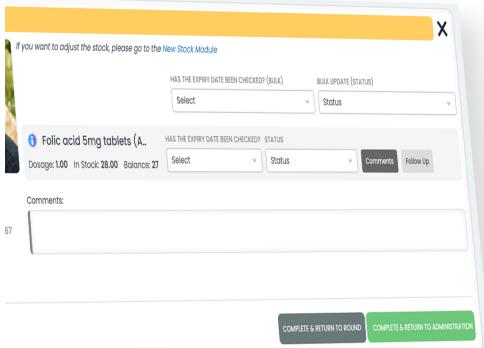

Simplified and Efficient Management

The system integrates easily with various administrative & medical processes, optimizing the team's time & ensuring excellent service.

Security and Protection

Care Vision runs securely in the cloud, with trusted security protocols. We're registered with the ICO, fully GDPR compliant, and meet the standards of the NHS (DSPT). Your team can focus on delivering care, knowing the data is safe.

Trusted by Care Professionals

Real People / Real Care / Real Results

"I love using Care Vision, these guys so accommodating, attentive & supportive in meeting individual service needs, open to all thoughts & suggestions to improve. Much more person centered than other digital systems."

Jan O'Hanlon

Regional Manager at, We care group

"Care Vision E-MAR has streamlined our medication management, replacing paper charts with a more detailed and organized system. It has halved the time spent on booking in medications and made MDT meetings more efficient with quick access to records."

Ryan Port

Padda Care

"Care Vision has transformed family communication they can easily view their loved ones' health updates, daily activities and photos in real time, keeping them connected and informed."

Michael Kelly

Team Manager at, Ryan QC Homes Ltd

Can I Keep My Current Pharmacy

Yes, absolutely. At Care Vision, we'll always do our best to work with your existing pharmacy. There's no need to switch we're happy to contact them directly and support the setup. But if you ever need another option, we've also built a trusted network of pharmacy partners across the UK who already know our system inside out and can get things started quickly. Whichever route you choose, our goal is the same: safe, smooth and reliable medication management for your home.

PMR Integration That Just Works

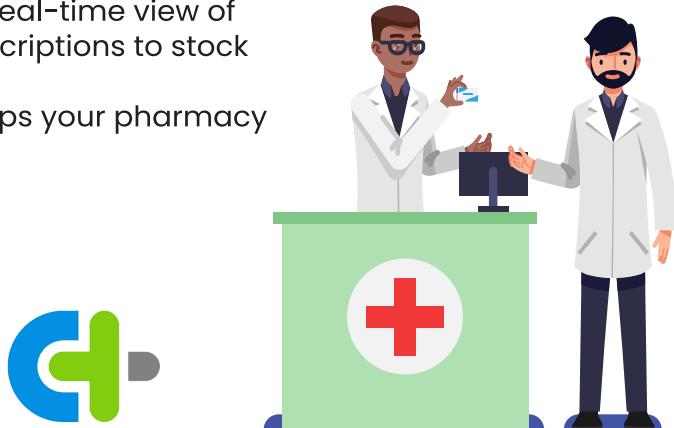

Care Vision currently integrates with [Titan](#), one of the UK's leading PMR systems. But even if your pharmacy uses something else, there's no problem they can still use our Pharmacy Portal to work closely with your home.

Our portal gives pharmacies everything they need to support you whether they're integrated or not. No hassle just better collaboration and smoother medication management.

Care Vision Pharmacy Portal

Our Pharmacy Portal gives your pharmacy team a real-time view of what's happening in your care home from new prescriptions to stock levels.

It cuts down on phone calls, reduces delays and helps your pharmacy support you better, every day.

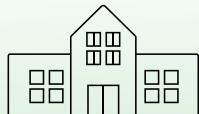

Need Help Finding a Pharmacy ?

We've built strong relationships with trusted pharmacy partners across the UK but the choice is always yours.

At Care Vision, we'll support whatever works best for your home.
